Note: This takes the previous trajectory by year and applies the percentage discounts to individual years for the commitment, resolution and other allocations components.  
 Commitment -5% discount of 8,268 = 413 spread over 14 years of completions from the commitment = 29.5pa rounded to 29 with 2029/30 rounded further to tally with 7,807 total  
 Resolutions -10% off each year's figures  
 Other allocations -20% of 1,384 = 277 spread over 17 years of completions = 16.3 rounded to 16 with extra taken off 2035/36 to achieve tally with 1,107 total

Numbers do not tally precisely with other summary trajectory due to rounding

Looking at James Ansell's printouts there would appear to have been 66 net completions on what might have been garden land in the period 2011-16 (the monitoring of different aspects of PDL only started in 2011 so it is not possible to go back any further.) Excluding these 66 from the 5 year total equates to 37 per year. NB this is the HCC definition of small sites being 9 or fewer dwellings. Also includes garden land

Note: - Two sites in Table 14 were selected for allocation but that selection was subsequently overtaken by events and the sites in question received planning permission in the meantime. These two sites in Bishopstoke & Botley are now not allocated and do not have a policy reference against them in Table 14. They are retained in this table for sake of completeness / consistency. They are not counted anywhere else in the trajectory. The planning permission reference numbers are quoted below instead.

Note: This takes the previous trajectory by year and applies the percentage discounts to individual years for the commitment, resolution and other allocations components.  
 Commitment -5% discount of 8,268 = 413 spread over 14 years of completions from the commitment = 29.5pa rounded to 29 with 2029/30 rounded further to tally with 7,807 total  
 Resolutions -10% off each year's figures  
 Other allocations -20% of 1,384 = 277 spread over 17 years of completions = 16.3 rounded to 16 with extra taken off 2035/36 to achieve tally with 1,107 total  
 New Allocations - 10% discount of 824 = 82.4 rounded to 82 spread over 8 years of completions = reduction of 10 per year  
 Numbers do not tally precisely with other summary trajectory due to rounding
